

# CHROMA METER CR-400/410

Introducing the successor to the Konica Minolta CR-300/310, our best-selling colorimeter globally accepted as the standard in a wide range of industries.

CR-410 Measurement area ø50mm

Data Processor DP-400

## The measuring head can perform measurement alone.

The measuring head is detachable from the data processor. Now, you can take measurements directly with the head alone. What's more, you can connect the measuring head directly to a PC. Simply install our optional software, and your PC can function as the data processor.

### User-defined evaluation formulas freely set up.

The CR-400 Series features a User Index function that allows you to configure the evaluation formula and color-calculation formula as desired. This feature is intended to meet the needs of color-control applications in which industry-specific or customized evaluation formulas are used instead of the versatile color system and standard evaluation formula such as L\*a\*b\*.

(Settings can be configured via a PC with optional software installed.)

# Abundant accessories applicable to various materials.

A varied selection of accessories is available to accommodate various types of targets including powder, paste and opaque liquids.

### Compact data processor incorporates a high-speed printer.

The compact, lightweight data processor is batteryoperated\* and features a built-in high-speed printer. Its size and weight are approximately one-half those of the conventional DP-300 Series. In addition, the CR-400 Series is designed with a detachable shoulder strap for easier portability. \*An AC adapter is included as a standard accessory.

## Full data compatibility with the CR-300/310 series

To ensure data compatibility, the CR-400 Series utilizes the same illumination-viewing optical system as the conventional CR-300/310 Series. As a result, those upgrading from the preceding model can make full use of their existing data.

Easy-to-understand the name on the buttons, ensure smooth measurement and setting operations.

Achieves exceptional accuracy

Inter-instrument agreement : CR-400:  $\Delta E^*ab$  within 0.6 CR-410:  $\Delta E^*ab$  within 0.8

Repeatability : within  $\Delta E^*ab 0.07$ 

User calibration function ensures higher accuracy. (Settings can be configured with the data processor or via a PC with optional software installed.)

- Color difference tolerance can be set to perform PASS/WARN/FAIL (Settings can be configured with the data processor or via a PC with optional software installed.)
- Offers a wider range of color systems than the CR-300/310 Series.
- The measuring head alone can store up to 1,000 measurements. When the data processor is connected, up to 2,000 measurements can be stored. (The measuring head can store up to 100 color-difference target colors with or without the data processor connected.)
- Capable of displaying color-difference graphs that provide a visual representation of the color difference. (When connected to data processor)
- A simple, cellular-phone-type text entry system is provided for entering the names of color-difference target colors and calibration channels. (When connected to data processor)
- Features a large, easy-to-see LCD with a built-in backlight.
- The LCD offers six user-selectable languages for the display mode, including English and Japanese. (When connected to data processor)

Can be powered with rechargeable batteries for reduced operating costs.

# The CR-400/410 Series really shows its abilities in these applications.

When measuring powders or pastes

With the varied accessories, you can measure targets with diverse profiles.

Granular-Materials Attachment CR-A50

Glass Light-Projection Tub CR-A33f (For CR-400) CR-A33e (For CR-410)

When color control is performed with a customized evaluation formula instead of the versatile color system

User-defined evaluation formulas can be entered as desired. Now, you can control color with customized evaluation formulas.

NON CAL	Grade B2	Grade A	Grade B1
User index function			ALIQUEA
-Example-			
Evaluation of tomato ripeness=a*/b*+0.3a*/L*	-1.0	0.0	1.0

Note: The evaluation formula and grade indicated above are hypothetical examples used only to demonstrate the user index function

When a compact colorimeter is needed in the field

The measuring head can be used independently of the data processor. This is advantageous when portability is required or limited space is available.

Vhen measurements need to be printed on-site for labeling of samples

The compact data processor features a built-in printer for superior mobility.

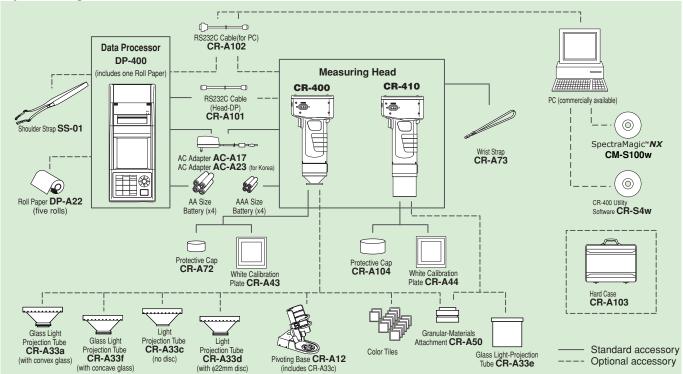

### System Diagram

### **Optional Accessories**

### Granular-Materials Attachment **CR-A50**

With the Granular-Materials Attachment CR-A50, the color of powders, pastes, grains, and other granular substances can be easily and accurately measured.

Glass Light-Projection Tube **CR-A33f** (For CR-400) and **CR-A33e** (For CR-410) Glass Light-Projection Tube CR-A33f and CR-A33e have a glass plate at the tip and can be used for measuring wet surfaces or for ensuring that materials such as textiles are flat during measurements.

Pivoting Base **CR-A12** (For CR-400) Attaching the Pivoting Base CR-A12 to the Measuring head of the CR-400 ensures greater stability and accuracy in measurements Light-Projection Tube CR-A33c is also included.

### SpectraMagic<sup>™</sup>NX (optional)

Supports Windows<sup>®</sup>2000/XP

SpectraMagic<sup>™</sup> NX enables you to perform comprehensive color inspection and analysis of incoming raw materials, in process production, and outbound color critical goods and materials in virtually any industry. With SpectraMagic \*\* NX you can insert digital images with measured data. Measure samples in any of 8 universally accepted color spaces. Select from 15 illuminants, and up to 40 indices to determine specific color and appearance properties, such as brightness, haze, yellowness, opacity and strength. You can even configure up to 3 customized color equations. Reports range from simple Pass/Fail to trend charts, histograms, color plots, and spectral graphs. SpectraMagic<sup>™</sup>NX comes with predefined templates using skin technology, or you can create your own templates. For illustrations and explanations to understanding color and color measurement technology, there is a link to Konica Minolta's well known and respected "Precise Color Communication".

### System requirements

OS	Windows <sup>®</sup> 2000 Professional SP4, Windows <sup>®</sup> XP Professional SP2
CPU	Pentium <sup>®</sup> III 600 MHz or higher
Memory	128 MB (256 MB recommended)
Hard disk	450 MB of available disk space
Display	Graphic card capable of displaying 1024 x 768/High Color (16-bit)
Other	CD-ROM drive (required for installation)
	One free USB port or printer port (for protection key) One free serial port (for instrument) Internet Explorer Ver. 5.01 or later

### Specifications

0.1	L*a*b*, L*C*h, Lab99, LCh99, XYZ, Hunter

display	difference distribution), Trend chart and				
	histogram of each color space and color				
	difference equation, Pseudo Color display				
	unerence equation, r seudo color display				

### CR-400 Utility Software CR-S4w

- To take measurements or change the measurement parameters of the CR-400/410 Series, you can control the unit with a PC.
- Measurement data can be transferred directly to a Microsoft Excel® file by means of the OLE function. (Excel® 97/2000/2002 is required to use the Excel® transfer function.)
- Calibration data and color-difference reference color data can be uploaded or modified.

#### Data Processor DP-400 255

Standard/Optional	
accessorie	

that some of the function ar	e not available when the measuring head is not connected.	accessories
Name	Data Processor	Color Data Software CM-S100w
Model	DP-400	SpectraMagic <sup>™</sup> NX
Display range	Y:0.01 to 160.00% (reflectance)	CR-400 Utility Software CR-S4w
Measurement time *2	1 Seconds.	White Calibration Plate
Minimum measurement interval *2	3 Seconds.	CR-A43
Battery performance	Approx. 800 measurements (when using batteries under company testing Konica Minolta's conditions)	White Calibration Plate
Illuminants	C. Des	CR-A44
Display	Chroma values, color difference values, color difference graphs, PASS/WARN/FAIL display	Protective Cap
Tolerance judgment *2	Color difference tolerance (box tolerance and elliptical tolerance) Only for the display function	CR-A72
Color space/	XYZ, Y x v, L*a*b*, Hunter Lab, L*C*h, Munsell (only illuminant C), CMC (I:c), CIE1994, Lab99.	Protective Cap CR-A104
colorimetric data	LCh99, CIE2000, CIE WI-Tw (only illuminant Des), WI ASTM E313 (only illuminant C),	RS-232C Cable
	YI ASTM D1925 (only illuminant C), YI ASTM E313 (only illuminant C),	CR-A101(Head-DP)
	User index (up to six registered in the Measuring Head can be used)	RS-232C Cable
Languages	Operating keys : English, LCD : English (default), German, French, Italian, Spanish, Japanese	CR-A102(for PC)
Storable data sets	Max. 2000 pieces of data (divisible into 100 pages)	AC Adapter AC-A17
	Deletion and Undoing selected stored data (one piece of data or all data) are possible	AC Adapter AC-A23(for Korea)
Color difference target colors *2	Only for the operating function (100 pieces of data when the measuring head is connected; input of	Wrist Strap CR-A73
	measurement values or numeric) (independent of page function)	Shoulder Strap
Calibration channels *2	Only for the operating function (20 channels when the measuring head is connected)	SS-01
	(ch00: white calibration; ch01 to ch19: user calibration)	Hard Case
Page function	100 pages	CR-A103
Display	Dot-matrix LCD with back light (16 chars x 9 lines + 1 line for icon display) Contrast adjustment	Roll Paper (one roll)
Printer	384 dot line thermal printer (can also print graphs) Automatically prints out all measurement results (can be set not to print)	Roll Paper
Statistical function	Maximum, minimum, average, and standard deviation	DP-A22(five rolls)
Automatic measurement *2	Date and time display: year, month, day, hour, minute	4 AA Size Batteries
	Timer: 3seconds. to 99 minutes.	HAR OLD BUILDING
	(Some measurement modes require more than 3 seconds.)	4 AAA Size Batteries
Interface	RS-232C compliant Baud rate (bps) : 19200 fixed (when connected to PC)	Glass Light-Projection Tube
	When measuring head is connected baud rate is automatically set to that of the measurement head	CR-A33a/f
Power source	4 AA size alkaline or Ni-MH batteries,	Light-Projection Tube
	AC adapter (AC-A17) AC120V $\sim$ 50-60Hz 0.4A (for N.America and Japan)	CR-A33c/d
	AC230V $\sim$ 50-60Hz 0.4A (for worldwide except N.America)	Glass Light-Projection Tube
Size	100(W) x 73(H) x 255(D)mm	CR-A33e Granular-Materials Attachment
Weight	Approx. 600g (not including batteries and paper)	CR-A50
Operating temperature/	0 to 40°C, relative humidity 85% or less (at 35°C) with no condensation	Pivoting Base
humidity range	* Operating temperature/humidity range of products for North America : 5 to 40°C, relative humidity 80% or less (at 31°C) with no condensation	CR-A12
Storage temperature/humidity range	-20 to 40°C, relative humidity 85% or less (at 35°C) with no condensation	Color Tiles
Other	User calibration function (multi-calibration/manual calibration) *2, Measurements for automatic average	
	function, Print ON/OFF function. CR-400 measurement data import function *2, All color space print ON/OFF	
	function, Data protection ON/OFF function. Back light ON/OFF function. Buzzer ON/OFF function. Display	
	color limit function, Remote mode (stored data output), Character input function (alphanumeric)	

Specifications are subject to change without notice.

SAFETY PRECAUTIONS

\*2 indicates that part of or all functions are not available when the measurement head is not connected.

For correct use and for your safety, be sure to read the instruction manual before using the instrument. Always connect the instrument to the specified power supply voltage. Improper connection may cause a fire or electric shock. Be sure to use the specified batteries. Using improper batteries may cause a fire or electric shock.
