New 80V 'SE' AC Controller Models Released

Dear Colleagues,

We are delighted to announce the immediate launch of two new 'SE' AC controllers to the SE family.

These new models join the existing 1236SE-6421 to complete the SE family lineup for 48-80V applications.

The Curtis 'SE' AC controllers utilize the latest technology to increase the peak current ratings for each size of controller. For a given rating, the SE models are smaller and lower cost than previous Curtis AC controllers, benefits that are highly advantageous for all types of applications.

The datasheet is available [here](#) on www.curtisinstruments.com.

CPN	MODEL NUMBER	MAIN BATTERY NOMINAL VOLTAGE	MAXIMUM CURRENT (A)	S2-60 MINUTE CONTINUOUS CURRENT
470336221	1232SE-6321	48-80	250	145
470436321	1234SE-6321	48-80	350	150

Available now, see International 1K price list for pricing.

Further technical information and conformance documents are available in the product introduction section in www.lunarinside.net. Click [here](#) for the 1232SE and [here](#) for the 1234SE.

Sincerely,

Richard McFarlane
